

# EtherConnect White Paper

Released November 14th, 2017

**What's ERC20 ? The Ethereum token standard (ERC20) is used for Ethereum smart contracts. Developed in 2015, ERC-20 defines a common list of rules that an Ethereum token has to implement. Giving developers the ability to program how new tokens will function within the Ethereum ecosystem. This token protocol became popular with crowdfunding companies via Initial Coin Offering ICO**

**Etherconnect is new ethereum smartcontract- governed ecosystem that applies blockchain technologies using the value of our business schemes and investment ideas. A strong community united to grow together and create powerful economy. We are building not only strong community but working on various development projects to benefit from collective investment and grow profit in gross. We are working with real estate, airline ticketing, hotel reservation, holiday packages and car rental. Token will replace the banking transactions.**

**Why ETHCC? ETHCC is so faster, smarter and cheaper than Bitcoin because it's on Ethereum blockchain. So ETHCC helps people those suffer the delay and loss of transactions.**

There are many problems that fester due to centralization and opaqueness; corruption, unaccountability, nepotism, inefficiency and stagnation. Ultimately, centralization leads to fragility; only decentralized systems can stand the test of time. These problems can be only solved by adhering to governance systems that do not rely on a central point of failure. Just like distributed networks and the consensus protocol itself, we believe that only truly decentralized projects can survive in the long run.

Etherconnect manifests these values by relinquishing control by a formalized central foundation. The only hierarchy is that of transparent meritocracy and mutual reputation. No backroom deals or behind-closed-doors unilateral decision making; just free and open discourse.

## SUMMARY

Etherconnect provides safe investment plan and allowing customers to earn while drinking coffee. Using our tools you could build your own network of currency users and earn.
